Android Developer

Company: Pulse Fit
Location: Bengaluru, India (hybrid)
Employment type: Full-time

About us

Pulse Fit is a fitness app used by over one million people to track workouts and meals.

About the role

We are looking for an Android Developer to build features for our fitness app. You will write clean Kotlin code, work with REST APIs and improve app performance.

Responsibilities

- Build new features in Kotlin
- Integrate with REST API services
- Store data offline with SQLite or Room
- Improve app start time and stability
- Review code and write tests

Requirements

- 2+ years of experience in Android development
- Kotlin and Java
- REST API integration
- SQLite or local data storage
- Git and code reviews

Nice to have

- Firebase
- Swift or iOS experience
- Agile teams

What we offer

- Health insurance
- Free premium membership and gym allowance
- Flexible hours

How to apply

Send your resume and a link to an app you worked on.
