DevOps Engineer

Company: Skyforge Cloud
Location: Noida, India (hybrid)
Employment type: Full-time

About us

Skyforge builds software for online schools, serving 3 million students a day.

About the role

We are hiring a DevOps Engineer to keep our cloud platform fast and reliable. You will automate deployments, manage infrastructure and help developers ship safely.

Responsibilities

- Run Docker and Kubernetes clusters in production on AWS
- Build and maintain CI/CD pipelines in Jenkins and GitHub Actions
- Manage infrastructure as code with Terraform
- Monitor systems and lead incident reviews
- Reduce cloud costs

Requirements

- 4+ years of experience in DevOps or infrastructure roles
- Docker and Kubernetes in production
- AWS or Azure
- CI/CD pipelines with Jenkins or GitHub
- Linux administration and Python scripting
- Problem solving under pressure

Nice to have

- Terraform
- Experience in Agile or Scrum teams
- GCP

What we offer

- Health insurance
- On-call allowance
- Certification costs paid

How to apply

Send your resume and tell us about an outage you helped fix.
