Project Manager

Company: Bluewave Software Services
Location: Chennai, India (hybrid)
Employment type: Full-time

About us

Bluewave builds custom software for hospitals, banks and retailers, with 250 engineers.

About the role

We are hiring a Project Manager to lead delivery of client software projects. You will plan timelines, manage risks, and keep clients and developers aligned from kickoff to launch.

Responsibilities

- Plan and run projects using Agile and Scrum
- Manage scope, budget and risks
- Run sprint planning and reviews in Jira
- Send clear status reports to clients
- Lead teams of developers, testers and designers

Requirements

- 5+ years of experience in project management
- Agile and Scrum delivery
- Stakeholder management
- Budgeting and reporting
- Excellent communication and leadership
- Bachelor's degree

Nice to have

- Jira and Confluence
- PMP certification
- Experience with healthcare or banking clients

What we offer

- Health insurance
- Yearly bonus
- Certification costs paid

How to apply

Send your resume and a short note on a project you rescued.
