Ananya Menon

Machine Learning Engineer

Hyderabad, India | ananya.menon@example.com | +91 90000 10003

PROFESSIONAL SUMMARY

Machine learning engineer with 4 years of experience designing, training and deploying deep learning models for natural language processing and computer vision. Strong in Python, PyTorch and scikit-learn, and in taking models to production with Docker, Kubernetes and CI/CD on AWS.

TECHNICAL SKILLS

Machine learning: PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers
Data: Python, NumPy, Pandas, SQL, Spark, statistics
MLOps: Docker, Kubernetes, AWS SageMaker, MLflow, CI/CD, GitHub Actions
Systems: Linux, Git, FastAPI

PROFESSIONAL EXPERIENCE

Machine Learning Engineer, Quillbyte AI Jan 2023 - Present

Hyderabad

- Fine-tuned a transformer model in PyTorch to route support tickets, reaching 92% accuracy and saving the support team 25 hours a week.
- Served models behind FastAPI on Kubernetes, keeping response time under 120 ms at 50 requests per second.
- Set up CI/CD with GitHub Actions to test, package with Docker and deploy models to AWS, cutting release time from 2 days to 2 hours.
- Tracked 300+ experiments in MLflow so results could be reproduced.

Data Scientist, Opticore Vision Labs Jun 2021 - Dec 2022

Chennai

- Trained computer vision models to spot packaging defects, reducing missed defects by 30% on 3 production lines.
- Built feature pipelines in Pandas and NumPy, and baselines in scikit-learn, for every new client dataset.
- Explained model results to plant managers using simple statistics and charts.

PROJECTS

Hindi-English news classifier, Personal project 2024

- Multilingual NLP model with 88% F1 on 20,000 labelled headlines.

EDUCATION

M.Tech. Artificial Intelligence, Coastal Institute of Technology 2019 - 2021

- Thesis: low-light image enhancement with convolutional networks

B.Tech. Computer Science, Malabar Engineering College 2015 - 2019
