Farah Khan

DevOps Engineer

Noida, India | farah.khan@example.com | +91 90000 10009

PROFESSIONAL SUMMARY

DevOps engineer with 5 years of experience keeping cloud platforms fast and reliable. Runs Docker and Kubernetes in production on AWS, builds CI/CD pipelines in Jenkins and GitHub Actions, and automates infrastructure with Terraform and Python.

TECHNICAL SKILLS

Cloud: AWS (EKS, EC2, S3, RDS), Azure basics
Containers: Docker, Kubernetes, Helm
CI/CD: Jenkins, GitHub Actions, Argo CD
Infrastructure: Terraform, Ansible, Linux administration
Scripting and monitoring: Python, Bash, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

DevOps Engineer, Cloudmint Software Mar 2021 - Present

Noida

- Run 14 Kubernetes clusters on AWS EKS serving 2 million daily users at 99.95% uptime.
- Rebuilt CI/CD in Jenkins and GitHub Actions so 40 developers can deploy in 12 minutes instead of 2 hours.
- Wrote Terraform for all AWS infrastructure, removing manual changes.
- Reduced the monthly AWS bill by 28% by right-sizing nodes and using spot instances.
- Led incident reviews and wrote 25 runbooks for the on-call team.

Linux System Administrator, Indus Data Centres Jul 2019 - Feb 2021

Gurugram

- Managed 300 Linux servers and automated patching with Ansible and Python.
- Moved 20 internal apps into Docker containers.

EDUCATION

B.Tech. Computer Science, Ganga Institute of Technology 2015 - 2019

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (2022)
- Certified Kubernetes Administrator (CKA) (2023)
